

WR133F-M20

1200M WIFI Router

WR133F is a 1200M 11AC dual-band wireless router specially designed for large-sized apartments. The router equipped with 64MB memory, which has larger data cache space, enables the system to run fast and stably. The built-in independent PA / LNA signal enhancement module and external 4 high-gain omnidirectional antennas produce strong signal penetration performance, which truly help to achieve the full coverage of dual-band WIFI in large-sized apartments. WR133F is widely used in various applications such as wireless relay, LED light / WIFI timer switch, USB sharing etc. It is an ideal router for requirement of large coverage, signal penetration and smooth surfing.
